

CMSI 182
INTRODUCTION TO COMPUTER SCIENCE
Fall 2007

Assignment 0904

We're just starting out, so this is mostly introductory reading, to "get your head in the game."

Not for Submission

1. Read Chapter 0 in the Brookshear book.
2. Want to peek ahead at some programming? Try out the JavaScript Scratch Page link on the course Web site: type `alert("Hello");` into the text area and click on the *Run* button to make the browser pop up a "Hello" message.

With regard to a Web browser choice, Firefox is particularly useful in this regard, with its *JavaScript Console* and *DOM Inspector* tools, as well as the availability of a free *Web Developer Plug-in*. If you don't have it, you can download it from <http://www.mozilla.com>.
