

CMSI 585
PROGRAMMING LANGUAGES (GRADUATE LEVEL)
Fall 2006

Assignment 0926

Better late than never — it's time to crystallize your research paper topics. As mentioned in the syllabus, your paper prospectus is due next week, and it counts as an assignment.

Not for Submission

1. Read Chapter 3 in Scott.
2. Scan the literature (on the Web, in the library, from references in the textbook) for any programming language that may interest you, or to help conceptualize a language that you would like to design.

For Submission

You already have a prospectus file committed to CVS. Flesh out that file, and commit the new version to CVS. Re-tag your *projects/cmsi585* directory with *hw-0926*.
