INTRODUCTION TO THE THEORY OF COMPUTATION
Fall 2018

Assignment 09 I I

This one took a little while to decide on, but I've now concluded that, even though it might not be as useful as in other courses, it's still better to have screengrab videos available than not.

Background Reading

If the course texts are available to you, the following readings will shore up the current material.

- Hopcroft-Motwani-Ullman Chapters 1–3
- Shai Simonson video lectures 1–3 (28 parts total)

What to Do

This assignment is simple, just “get this information to me,” but it's still worth points and many of you have already done it in other courses so...

- Screen capture videos will be shared as invitation-only private YouTube links. Thus, if you don't already have one, acquire a Google account that can be used to access such links.

What to Submit

Because this information may be personal/private, relay your Google accounts to me via Brightspace. An “assignment” has been set up for this under which you can enter the information.

For equity of effort across the board, please do this anyway even if you've already done it for another class. It's easier to just pick up a bunch of Google accounts from the Brightspace submissions than to track down notes like “Same account as the other class...” Thanks!
