OPERATING SYSTEMS (GRADUATE LEVEL) **Spring 2006**

Assignment 0131

Okay, time to dive in with some programming. Be sure to access the text's accompanying Web site to get the initial source code starting point.

Not for Submission

1. Read Chapter 3 in SGG.
2. You will need access to a Unix machine with a C compiler; if you don't have one of your own (Linux PC, Mac OS X, etc.), then acquire a Keck lab account.

For Submission

Do the project at the end of Chapter 3 in SGG — the Unix shell and history feature. As usual, submit your code in both hardcopy and electronic formats.
