OPERATING SYSTEMS (GRADUATE LEVEL) Spring 2006

Assignment 0418

Not for Submission

We'll cover a selection of topics next week ranging from chapters 14-18.

For Submission

For this assignment, we focus on the paper, which is due on April 25. Submit the current draft of your paper to me by April 18 (sooner is OK) on hardcopy, both printed version and LaTeX source (*.tex* and *.bib* files). I'll endeavor to give you feedback on the paper, as well as operational suggestions with how you're using LaTeX and BibTeX (which is why I would like to see the source as well).

Extra Credit

If you turn in your presentation material as well as your paper draft by April 18, then I will count that as an extra credit assignment.
